Application No. 10/722,112

Filed: November 25, 2003

TC Art Unit: 1722

Confirmation No.: 4850

AMENDMENTS TO THE SPECIFICATION

Please amend in the Description of the Related Art, page 1,

lines 12 through 19, to read:

In a conventional injection blow molding device in the

related art, an injection mold and a blow mold which use a lip

mold in common (alternatively, referred to as a neck mold) are

provided and the outside surface, which is brought into contact

with the molds, of the lip mold is formed in a tapered surface and

the lip mold can clamp both of the injection mold and the blow

mold. (for example, see-patent document 1)

[Patent document 1] (see JP-A 2000-43128 (Fig. 1, Fig. 2)
